

**DISH:** Jointly founded by National Food Institute - Technical University of Denmark (DTU), Alma Mater Studiorum – University of Bologna (Unibo), Lund University (LU), and The Hong Kong Polytechnic University (PolyU), **DISH Global Centre for Food Safety and Quality** is a non-profit collaborative alliance set out to address challenges in global food safety, with the motto of “Powering Food Safety with Science and Technology.” It is a unique Europe-Hong Kong establishment by four economies – Denmark, Italy, Sweden, and Hong Kong, with the vision to become a global leading collaborative centre for food safety. Through this key representation of academic collaborative efforts in engaging the industry, government, NGOs and other stakeholders, DISH is designated to translate into a true global effort to advance food safety, building on each partner’s networks, experiences and skills, and to reach its final goal of creating impact on society in the long run.
